Pure Power.
No Doubt!

Millertech®

2026 Marine & Sport Catalog

Dear Valued Friends and Customers,

As we open the pages of this year's catalog, our hearts are full of gratitude for each and every one of you. The past year has been filled with incredible opportunities and shared successes, all made possible by your unwavering support and loyalty.

At Millertech, we're more than just a business; we're a family. And we feel incredibly blessed to have such a strong community of customers and dealers who are a part of that family. These relationships are the foundation of Millertech, and it's your trust and partnership that have helped us grow into what we are today.

Looking ahead, while we're excited to share our latest products with you, our greatest desire is to deepen our connections. We want to continue being your friends, building even stronger working relationships, and being a trusted part of your journey.

We believe that the most remarkable achievements in history have come from communities where people choose to work together. Thank you for being that community for us.

May God bless you all.

Warmly,
The Millertech Team

About Us...

Established in 2015, Millertech Energy Solutions is a family-owned and operated business that specializes in designing, developing, and sourcing high-quality LED lighting and energy storage products. Realizing the growing demand for efficient, clean and green energy solutions, our goal is to provide a wide range of high-quality products at the lowest price possible so we can meet these ever-growing demands.

Our Mission

Using our God-given creativity, we empower people with practical energy solutions, rooted in our commitment to serve others.

Our Core Values

Stewardship

- We recognize everything we have – our resources, time, people, and finances – as gifts God has entrusted to us.
- We develop practical solutions that conserve everyone's time and energy.
- We nurture our relationships to increase our fruitfulness.
- We use the fruits of our labor to build the kingdom of God.

Community

- We work together through effective communication to accomplish our common goals.
- We support each other by celebrating our wins and helping each other fail forward.
- We primarily employ people from our community who share our work ethics, and values.
- We uphold ethical standards with all our vendors, and customers, ensuring transparency, and trust.

Commitment

- We serve our customer base by taking time to listen to them and ensure their needs are met.
- We delight our customers by under promising and over delivering every time.
- We develop and maintain thriving relationships with our team members, vendors and customers.
- We strive for loyalty with our customers by upholding our warranty policies and keeping our promises.

Excellence

- We continuously improve our products and services.
- We display professionalism in our marketing and sales.
- We offer knowledgeable customer service via personal interaction.
- We develop our team members and provide them with resources they need for success.

Creativity

- We encourage innovative thinking that empowers our people to solve problems.
- We make calculated decisions and view failure as an opportunity for growth and development.
- We collaborate as a team to experiment, create and produce quality products.
- We inspire vision for a better future.

Our Hassle-Free Warranty

All products manufactured and distributed by Millertech Energy Solutions have a warranty ranging from one year to 10 years. Unlike large corporations, with Millertech you can rest assured, that if by chance, you have a warranty claim, it will be solved with an honest, understanding, hometown approach.

All defective products must be shipped to Millertech Energy Solutions LLC along with a copy of your purchase receipt. At our discretion, we will repair, replace or give credit for items returned under warranty. Tampering or abuse of product will void warranty coverage!

FAQs

Can I charge my Millertech battery with an alternator?

Yes, you can, but only if your alternator's max voltage output is 14.6V or below. We have found there is a big difference in voltage output from one alternator to the next. When using an alternator with high amperage output, always make sure to use ring terminal connections in order to get good connections with no heat build up. If you want to use an alternator, but don't know if it is compatible with lithium, please call us and we will try to help you with your decision!

Are Millertech lithium batteries safe?

Yes. Every Millertech battery is built using the highest quality materials available. The lithium cells used in our batteries are UL, CE, Rohs, and RU approved. Steel rod, puncture test, dead short test, high voltage overcharge test, 30 ft. drop test, and crush test are amongst the tests performed. In the fire test, the cells kept their shape and did not explode even though the plastic casing burned completely. Lithium batteries are capable of high electrical currents — use caution when using a lithium battery. The greatest chance of battery problems is battery overcharging. Although extremely unlikely, our Battery Management System (BMS) overcharge protection could fail, so it is important to use a charger that is compatible with lithium. If you have questions about your battery charger, please call us and we will help you evaluate your situation.

Can Millertech lithium batteries be used to start an engine?

Our Dual Purpose batteries are built to start boat engines as well as provide consistant and long lasting power to keep it running all day. Millertech Deep Cycle lithium batteries are not designed to be used in starting applications. Note: These batteries will not start large (100HP+) diesel engines.

Are Millertech lithium batteries a good choice for solar applications?

Yes. Millertech lithium batteries are a perfect choice for solar, wind, and other renewable energy applications. Our batteries are sealed, making them perfect for installing in confined environments. Large, heavily-used, flooded battery packs need a lot of attention and continuous monitoring to keep water levels and corrosion in check. A Millertech $LiFePO_4$ pack requires zero maintenance or monitoring. Simply install it, set it, and forget it. Millertech solar batteries have 5,000 cycles at 50% DOD, compared to flooded lead-acid which have between 800 - 1,000 cycles. Millertech solar batteries have between 5x - 6x the life of a flooded solar battery and you only need to pay for installing one Millertech pack versus 5 or 6 lead-acid packs.

Millertech solar batteries are 98% efficient,compared to flooded lead-acid, which after 100 cycles is only 60% efficient. If you have questions about using Millertech lithium batteries for your solar application, please contact us for a free quote.

How does Millertech compare with other lithium batteries?

This is a question that we feel can only be truly answered with time. We do not know what type or grade of materials other batteries are made with. We do know that most lithium batteries will perform OK for the first 500 cycles, but in order to perform perfectly for 5,000 cycles (at 50% DOD) and last 10-20 years, only a battery manufactured with the best components can meet that criteria. Millertech's engineers specify every component that goes into every one of our batteries. We use only Grade A cells from the top three manufacturers in China. All Millertech batteries use commercial grade BMS's that are oversized by at least 20A (a 40Ah battery rated for 40A continuous charge and discharge is capable of 60A). All Millertech BMS's are designed with high voltage withstand capability, (100V) — our batteries can be connecting in series up to 48V with no chance of BMS failure. Our BMS's also have a larger balancing current rate than off-the-shelf BMS's, which will keep our batteries running at peak performance for thousands of cycles!

Top Three Reasons Your Millertech Battery Could Fail. (5 Year Data Analysis)

1. Water Damage. The #1 reason batteries are returned for warranty or repair is because of long-term exposure to direct rain or wet conditions. We continuously strive to make our batteries watertight, but creating a 100% waterproof battery would also create internal condensation and could also damage the circuitry. Testing has found that exposing our battery to direct rain for up to 30 minutes had no effect on performance.

2. Abusive Charging. All our batteries have built-in Battery Management Systems. The BMS is designed to keep the battery safe and protect it from extreme situations. Unfortunately, the BMS still has restrictions of what it is capable of. For instance, charging a 45Ah battery with a 100A, 18V alternator will most likely ruin the BMS and you will need to have it replaced. Always make sure your charger is lithium-approved! If you're not sure, give us a call and we will be happy to help!

3. Loose Connections. Lithium batteries can release a lot of energy quickly. Most of the time this is an advantage, but sometimes clamps are used instead of ring terminals. Transferring high currents through a clamp is not safe. The connection point can become very hot and unsafe, which can lead to the plastic casing melting around the terminal and causing the battery terminal/post to become dislodged. This could create a short circuit and will ruin your battery. Always use correct connecting techniques!

MARINE

What Makes it a Marine Battery?

All Millertech Marine batteries are sealed with a **RUBBER GASKET** to ensure no water gets inside!

Our custom molded, heavy duty, reclosable battery case has a marine-grade, **STAINLESS-STEEL BREATHER VENT** which allows air flow to prevent condensation. Our vent is installed on the top of the case, unlike other brands where the vent is positioned below, catching rain and dirt.

HOLD-DOWN STRAP GROOVES on the case keep straps securely in place, so no need to worry about your batteries staying where they belong.

BUILT-IN BLUETOOTH connects to the Millertech App. For iOS and Android, the app gives you real-time data, including remaining capacity, voltage, current and temp. for up to six batteries all in the same ap!

The built-in **BATTERY MANAGEMENT SYSTEM** (BMS) prevents overcharge, over-discharge, internal over-temperature, voltage, short circuit and provides prismatic cell protection, making them one of the safest lithium batteries on the market. The **LOW VOLTAGE ALARM** notifies you before the voltage gets too low!

DUAL PURPOSE

What Is Dual Purpose?

The Millertech Dual Purpose battery is your go-to **STARTER BATTERY!** The cranking amps on our Dual Purpose batteries can turn over even the largest marine engines in the industry!

The Dual Purpose battery is also a DEEP CYCLE battery - It's built to deliver steady reliable power for long periods of time

The Dual Purpose battery is meant for anyone who needs a starter battery, but also wants to have amazing lasting power to keep them going all day long..

MARINE ELECTRONICS

What Is An Electronics Battery?

The Millertech Electronics battery is your best solution for making sure you have consistently clearer images, and stronger signals on all your boating electronics for your whole day on the water.
CLEARER. STONGER. LONGER.

HEATED

Why A Heated Battery?

While most of our Sports Series batteries have a charging temperature range between 32°F - 130°F, our new Heated Series line of batteries have built-in heaters that allow you to **PUSH THE LIMITS OF COLD-WEATHER FISHING DOWN TO 0°F**!

MARINE
DEEP CYCLE
BATTERIES

MARINE

- Built-In Bluetooth *with app that allows up to 6 batteries!*
- Battery Management System *protects the battery*
- Low Voltage Alarm
- Rubber Gasket *seal*
- SS Breather Vent *on top*
- Strap Grooves *on case*

DEEP CYCLE

Built to deliver steady power over long periods. Designed to discharge deeply without damage.

That Means: Longer Runtime, More Usable Energy, And A Significantly Longer Lifespan.

12V 15Ah

SPORT SERIES Bluetooth

Item #1215-BT
Retail: **$125**

10 YEAR WARRANTY

MARINE DEEP CYCLE

Capacity	15Ah
Voltage	12.8V
Weight	3.1 lbs.
Size	6” x 4” x 4”
BMS	Yes
Chemistry	LFP
Efficiency	98%
Memory	No
Max Charge/Voltage	14.6V
Low Cut-off Voltage	10V
Max Charge/Discharge Current	15A
Operating Temp	-4F°–140°F
Low Temp Charging Protection	Yes
Connection Capability	4S-4P
Cell Type	Cylindrical
Peak Discharge Current	45A - 5 Sec.
Bluetooth	Yes
Warranty	10 years

12V 22Ah SPORT SERIES Bluetooth

Item #1222-BT
Retail: **$169**

10 YEAR WARRANTY

MARINE DEEP CYCLE

Capacity	22Ah
Voltage	12.8V
Weight	7.8V
Size	7.125” x 3.125” x 6.125”
BMS	Yes
Chemistry	LFP
Efficiency	98%
Memory	No
Max Charge/Voltage	14.6V
Low Cut-off Voltage	10V
Max Charge/Discharge Current	22A
Operating Temp	-4F°–140°F
Low Temp Charging Protection	Yes
Connection Capability	4S-4P
Cell Type	Cylindrical
Peak Discharge Current	66A - 5 Sec.
Bluetooth	Yes
Warranty	10 years

12V 40Ah SPORT SERIES Bluetooth

Item #1240-BT
Retail: **$299**

WARRANTY	10 years

"I'm fishing in the coldest water - ever - in my entire career. I was breaking ice! With Millertech I have had nothing but raw power, the same as if it was 90° every day. I can just stand on my trolling motor ALL DAY LONG - it can be cold, hot, it doesn't make any difference. I never worry about power. Kudos to Millertech. Cold, Warm, Hot, they're good every day!"

– Greg Hackney

MillerTech **DUAL PURPOSE** batteries are built to handle both starting your engine and powering your electronics, all in one battery. That means you get the cranking power to start your motor, plus the capacity to run graphs and accessories for long days on the water. Instead of managing separate batteries, you get reliable, all-day power from a single, smarter setup. STRONG. SIMPLE. RELIABLE.

GO-JUICE!

THE RELENTLESS LITHIUM POWER YOU NEED

MillerTech Dual Purpose LiFePO4 batteries are the result of focused development by our team of engineers and technicians, who have worked to optimize both high cranking performance and sustained energy delivery in a single platform. These batteries are engineered to deliver the high discharge current required to start large marine engines, while also maintaining the reserve capacity and voltage stability needed to support multiple high-demand electronics over extended periods. Achieving this balance requires careful integration of cell selection, BMS calibration, and thermal and load management, ensuring reliable performance across both starting and deep cycle applications. The result is a true dual purpose solution designed to meet the evolving power demands of modern marine systems.

12V Electric Battery Chargers - Lithium

Millertech

12V4A AC-DC Charger

Item #124AC-8D Retail: **$40.00**

- 5.5 x 2.5mm output plug

Input Voltage	100-130V AC
Output Voltage	14.6V
Output Current	4A
2 Stage Charging	Yes
Fuse	No

12V5Ah Charger

Item #125C Retail: **$49.99**

Input Voltage	110V AC
Output Voltage	14.6V
Output Current	5A
2 Stage Charging	Yes

12V10Ah Charger

Item #1210C Retail: **$69.99**

Input Voltage	110V AC
Output Voltage	14.6V
Output Current	10A
2 Stage Charging	Yes

12V20A Charger

Item #1220C Retail: **$99.00**

Input Voltage	110V AC
Output Voltage	14.6V
Output Current	20A
2 Stage Charging	Yes
Fuse	Automatic

12V40A Charger

Item #1240C Retail: **$199**

Input Voltage	110V AC
Output Voltage	14.6V
Output Current	40A
2 Stage Charging	Yes
Fuse	Automatic

NEW!

12V 15A 2-Bank Charger

Item #1215-2 Retail: **$412**

Input Voltage	90V -130V AC
Output Voltage	14.5V
Output Current	15A Per Bank
2 Stage Charging	Yes
Fuse	Automatic

- User adjustable for lead acid, AGM and lithium batteries
- Marine Grade Construction
- Aluminum Housing
- Waterproof Cooling Fan on Bottom
- LED Indicators to show charging progress
- Wake Up Function for Lith. batteries in low volt protection
- Short circuit protection, Reverse Polarity Protection, Overcharge Protection, Overheat Protection

NEW!

12V 15A 3-Bank Charger

Item #1215-3 Retail: **$497**

Input Voltage	90V -130V AC
Output Voltage	14.5V
Output Current	15A Per Bank
2 Stage Charging	Yes
Fuse	Automatic

- User adjustable for lead acid, AGM and lithium batteries
- Marine Grade Construction
- Aluminum Housing
- Waterproof Cooling Fan on Bottom
- LED Indicators to show charging progress
- Wake Up Function for Lith. batteries in low volt protection
- Short circuit protection, Reverse Polarity Protection, Overcharge Protection, Overheat Protection

Item #4825M

Retail: **$299**

Input Voltage	110V AC
Output Voltage	58V
Output Current	25A
Waterproof	IP65
Dimensions	11” x 3” x 7”
Warranty	3 Years

All Marine Chargers come standard with 50A Anderson Quick Connectors!

3 YEAR WARRANTY

Dark Speed "On-The-Run" Dual-Bank LiFePO4 Battery Charger

The Dark Speed "On The Run" charger offers an advantage over traditional charging methods by allowing you to recharge your auxiliary lithium battery bank directly from your motor's alternator while diverting extra power directly to your 24V or 36V battery.

12V Cranking and 24V Trolling Battery

Item #DS24 Retail: **$599.99**

Input Voltage	90-130V AC
AC Power Draw	650W
Output 1	14.5V - 15A
Output 2	28.8V - 15A
Start Transfer Voltage	14V
Stop Transfer Voltage	13.3V
Waterproof	IP65
Dimensions	10.75" x 7.75" x 3.5"
Weight	13.8 lbs.
Warranty	3 Years

12V Cranking and 36V Trolling Battery

Item #DS36 Retail: **$599.99**

Input Voltage	90-130V AC
AC Power Draw	857W
Output 1	14.5V - 15A
Output 2	42.6V - 15A
Start Transfer Voltage	14V
Stop Transfer Voltage	13.3V
Waterproof	IP65
Dimensions	10.75" x 7.75" x 3.5"
Weight	13.8 lbs.
Warranty	3 Years

Dark Speed "On The Run" vs. Traditional Lithium Battery Charging Methods

DARK SPEED	TRADITIONAL
Charging speed and efficiency	
Enables fast and continuous charging of your whole lithium battery system while your motor is running. This eliminates downtime associated with traditional charging methods and keeps your equipment ready for extended use.	Often require longer charging times since no power is being distributed throughout the day.
Power source and convenience	
Utilizes your vehicle's alternator as the power source, providing convenient and fast charging whenever you're on the move. This eliminates the need for daily shore power hookups, generators, or external power sources.	Rely on external power sources or separate charging units often limiting your day on the water to less than 10 hours.
Flexibility and freedom	
It lets you stay out on the water longer without worrying about power depletion. You're no longer tethered to a fixed power source.	Can be restrictive, requiring you to use a generator for daily recharging.

Millertech

Dual-Bank LiFePO4 Battery Charger

MARINE

Millertech Marine **Dual-Bank** LiFePO4 Lithium Battery Charger

12V Cranking and **24V** Trolling Battery

Item #1210-2415 Retail: **$429**

Input Voltage	80-120V AC 60Hz
